# TILE POLISH & SHINE

## Cleaning & Refreshment for Ceramic Floor Tiles

### DESCRIPTION

**PALACE TILE POLISH & SHINE** is a blend of surfactants, acrylics and low odour solvents ideally suited for cleaning & refreshing all types of sealed and unglazed ceramic floor tiles and in particular semi-porous surfaces such as quarry & natural stone tiles, including those which have previously been treated with a sealing solution to protect & enhance the satin finish.

### APPLICATION METHOD

Dilute about 10ml of solution per 1 litre of lukewarm water and mop or wipe evenly and across the tiled surface. Wring out the cloth regularly in the solution to remove dirt as it is picked up and then leave the treated surface to dry naturally without rinsing the floor after this treatment has been applied.

### PROPERTIES

**PALACE TILE POLISH & SHINE** cleans and protects the ceramic tile surface whilst at the same time enhancing the colour & texture. This water based concentrated treatment will also refresh tiles previously protected with a seal coat of "Satin Seal & Polish" by helping to maintain the semi-shine protective finish previously achieved by the original surface sealing application by reinforcing the existing layer of acrylic protection.

### COVERAGE

When diluted for use as recommended, this product will cover the tiled surface at a rate of about 4 to 5 square metres per litre of diluted product.

### STORAGE AND PACKAGING

**PALACE TILE POLISH & SHINE** is supplied in 1 litre bottles packed 6 per case.

### HEALTH AND SAFETY

**PALACE TILE POLISH & SHINE** is a water-based concentrated solution, which should be stored in a frost-free location. Keep locked up and out of the reach of children and if swallowed, seek medical advice immediately and show this container or label.

### QUALITY AND ENVIRONMENT

All Palace Chemicals products are manufactured under a BSI accredited ISO 9001:2015 Quality Management System, along with an ISO 14001 Environmental Management system continually working to reduce our carbon footprint.

### TECHNICAL ADVISORY SERVICE

Should more specific technical information be required, contact the Palace Technical helpline on: **0151 486 6101**.
