4.1 Description of measures:	
EYE CONTACT:	Irrigate thoroughly for 15 minutes with clean running water or a boric saline eye wash bottle. Seek medical attention should eye irritation persist or become inflamed.
INHALATION:	Avoid working in a poorly ventilated, confined space. Remove to fresh air and rest. If irritation or breathing difficulties persist, seek medical attention.
SKIN CONTACT:	Wash off skin with warm soapy water. Remove contaminated clothing and launder regularly. Prolonged and unattended contact should be avoided. Where irritation to skin is apparent seek medical attention.
INGESTION:	Clean out mouth with copious volumes of water and drink plenty. Do not induce vomiting. Beware of aspiration if vomiting occurs. Seek prompt medical attention and show this data sheet
4.2 Acute & Chronic symptoms:	
Inhalation:	Vapours inhaled in strong concentration have a narcotic effect on the central nervous system. Irritation of the respiratory tract due to excessive fumes causes headache, drowsiness or other effects to the central nervous system, loss of consciousness.
Ingestion:	Nausea, vomiting, abdominal pain.
Skin contact: Eye Contact:	Prolonged or repeated contact may cause irritation and dry skin. Burning feeling and temporary redness.
4.3 Immediate medical attention:	This will be needed to resolve the most severe risk which is through ingestion as the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious inhalation pulmonary lesions (medical survey during 48 hours).
5. FIRE FIGHTING MEASURES:	
5.1 Extinguishing media:	Dry powder; Foam, C02 – Do not use water jets.

5.2 Combustion Hazards: 5.3 Advice for fire-fighters:

Hazardous decomposition when subject to combustion – will produce noxious, irritating fumes. Use approved self-contained breathing apparatus. Only use a fine water spray to cool down heat affected containers – not burning product. Cool containers exposed to flames with water until well after the fire is out. Keep run-off water out of sewers and water sources. Dike for water control.

6. ACCIDENTAL RELEASE MEASURES:

6.1 Personal protection:	Ventilate area and eliminate all sources of ignition. Wear personal protective equipment recommended in section 8.
6.2 Environmental precautions:	Do not allow spill to enter drains or watercourses. Form a dam with sand, earth or a boom. Absorb, bund and scrape spillages onto sand, sawdust or absorbent granules.
6.3 Spill removal methods:	Confine residues in clearly marked sealed containers for disposal in accordance with Local Authority regulations for flammable products – subject to special waste management controls.
6.4 References to other sections:	Wear protective clothing as described in Section 8 of this safety data sheet. See section 11 for additional information on health hazards. For waste disposal, see section 13.

7. HANDLING & STORAGE:

7.1 Safe handling precautions:	Eliminate all sources of ignition. Risk of vapour concentration on the floor and in low-lying areas. Static electricity and formation of sparks must be prevented. Use explosion proof electric equipment. Wear full protective clothing for prolonged exposure and/or high concentrations. Contaminated clothing and shoes must be discarded. Contaminated rags and cloths must be put in fireproof containers for disposal. Ventilate well, avoid breathing vapours. Use approved respirator if air contamination is above accepted level.
7.2 (a) Safe storage conditions:	Store in tightly closed original container in a dry, cool and well-ventilated place. Keep in original container. Take precautionary measures against static discharges.
7.2 (b) Incompatible materials:	Keep away from oxidisers, heat and flames. May attack some plastics, rubber and coatings.
7.3 Specific end uses:	The identified uses for this product are detailed in Section 1.2.
