

SCREEN WASH

Date issued: Jan 15

Fast acting windscreen wash bottle additive

- **Anti smear dries crystal clear**
- **Helps remove traffic film and insect smears**
- **Can be used all year round**
- **Effective down to -15°C**
- **Safe on paintwork**

Description:

LANGLOW Screen Wash is a blend of highly active detergents and fast drying alcohol based solvents effective in both the extremes of winter and dry summer conditions. When added to the wash bottle water reservoir it cuts through grime and insect smears whilst also reducing the likelihood of screen freezing at low temperatures. The end result is always a gleaming, smear-free finish after each jet on the screen.

Application Method:

In winter weather this product should be added to the wash bottle as a neat undiluted solution, however it's all year round cleaning activity make it suitable for dilution as one volume with up to 3 volumes of added water under more temperate conditions.

Coverage:

One single 5 litre bottle is usually sufficient to fill the average car wash bottle to capacity. The duration this 5 litre unit will last depends on the time of year it is used and frequency of application when driving.

Technical Advisory Service:

Should further more specific technical information be required, contact the Palace Technical helpline on 0151 486 6101.

Storage & Packaging:

SCREENWASH is supplied in 5 litre bottles packed 4 per case and when stored in sealed ambient conditions and has a shelf life of not less than 12 months.

Health & Safety:

Consult the SCREENWASH material safety data sheet for advice on handling and safety procedures.

The information provided by this Technical data sheet is given in good faith and is to the best of our current knowledge true and accurate. However it is given without guarantee, as conditions of use and workmanship involved are both beyond our control. All information supplied is subject to the company's terms and conditions of sale, copies of which are available on request.
