HAND SANITISER
Fast Acting Protective Agent

DESCRIPTION

PALACE HAND SANITISING GEL is an easy to apply alcohol based sanitising treatment, based on 70% ethanol and is an effective means of eliminating 99.9% of Viruses & Bacteria on immediate contact**.**

PALACE HAND SANITISING GEL is a fast drying ethanol based composition, designed to be effective against harmful microbial contaminants and a wide range of viral and bacterial infections. This product is compliant to the world health organisation guidelines.

PALACE HAND SANITISING GEL provides long lasting protection due to its emollient. Which will preserve the skin and ensures the treatment remains safe to use. This feature also prevents the skin from drying out, adding an extra layer of highly effective protection. This product can also act as a secondary disinfectant agent for extra protection while eliminating the need of using wipes or towels to dry up hands after washing with water.

TO DRY WASH AND STERILISE HANDS

Dispense a small amount directly into palms. Rub hands together until dry, paying special attention to the areas between fingers & around nails. Avoid contact with eyes and broken skin which if irritation occurs should then be washed with clean running water for 10-15 minutes.

HEALTH AND SAFETY

Flammable liquid and vapour. Causes serious eye irritation. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **If eye irritation persists:** Get medical advice/ attention. Store in a well-ventilated place. Dispose of contents/container to an approved waste disposal plant. Keep cool.
